

ETF candy collect way

EthereumFog (ETF) is the Ethereum (ETH) fork. You can download the ETF official wallet from <http://ethereumfog.org/cn/>, and import the ETH wallet **private key** or **keystore**, then you can get the candy.

一、The ETH wallet takes imToken wallet as an example:

二、Export **private key** or **keystore** in the imToken wallet.

三、Import **private key** or **keystore** to the ETF wallet to get candy. Keystore password is wallet password, ETF wallet won't save private key or keystore password.

Any questions , please contact person of ljr500121(wechat).
